

EMS partners with Fagen, Inc.

Miner County Pioneer

February 12, 2004

Gary, South Dakota based Energy Maintenance Service, LLC (EMS) announced today it has completed a transaction that partners the company with Granite Falls, Minnesota based Fagen, Inc.

According to Joe Kolbach, Founder and President of EMS, "As the Wind Industry continues to mature here in North America, there remains a pressing need for organizations that are capable of offering comprehensive, professional services to developer, owners/operators and equipment manufacturers. Our partnership with Fagen, Inc. brings together two organizations with very distinct yet complementary skill sets which help fill this market need.

Ron Fagen, Founder and President of Fagen, Inc. states, "We are very excited to be a part of EMS because of our strong belief in renewable power and fuels. Fagen, Inc. has built 70% of the ethanol industry and has been involved in numerous power plant projects. This relationship will be mutually beneficial because of Fagan Inc.'s heavy industrial construction background, highly qualified workforce numbering 1000+ and licenses in 36 states.

Founded in 1998, EMS is one of North America's leading independent providers of products and services to the wind industry. Services offered include: Construction, Commissioning and Decommissioning of Wind Projects; OEM Warranty Repair; Operations and Maintenance; Unscheduled Maintenance; 24/7 SCADA Operations; Asset Management; Technical Support; Installation and Repair of Meteorological Systems; and Turbine Remanufacturing, Sales and Installation.
