

New development project in progress

Miner County Pioneer

June 14, 2007

Construction began last week on the water and sewer project east of the golf course. This project will bring city utilities within the city limits previously not serviced by the city.

Included in the new service territory is the community's newest housing development, Carmon Meadows. The project, which is located along the golf course, will make residential lots available.

Lots in this development are currently for sale. Interested parties should contact Steve Carmon at 605-772-4608 (home), 605-772-5308 (work), 605-480-0676 (cell).

The contract for the work was awarded to Excel Underground, Inc. with a projected completion date of July 15.
